Momentum Yes is an introductory global mission course that enables you to see what God is doing in the world and how you can say “Yes” to being involved. It is endorsed by several mission agencies and has been used by churches internationally.

It is designed for small groups to do over 6 sessions using videos and discussion questions provided. You don't need to be an expert to facilitate a group.

We would love to see this course offered to student and graduate CMF groups around the UK. Join us online to take the course together and consider whether you could offer it to others online or face to face in your area.
