

ObGyn HOD

Description

Kanad Hospital is hiring an ObGyn HOD with strong leadership skills and someone who upholds our values, preferably Female.

The team consists of 24 full time physicians and 5 visiting physicians, and is one of the busiest and biggest departments here. We have more than 300 deliveries a month. We are looking for a consultant for this role with laparoscopic skills. Past experience as HOD is preferred but not mandatory, however involvement in committees and other quality works (like JCI, etc.) is necessary.

Kanad Hospital (formerly known as Oasis Hospital) was established in 1960 by Doctors Pat and Mariam Kennedy at the request of HH Sheikh Zayed Al Nahyan. The Kennedys were physicians from the United States whose primary goal was to honor God by providing loving healthcare to those in this region. Ever since our launch, Kanad has been known for its excellent obstetric and pediatric care, and we are proud to be recognized as one of the premier healthcare providers for women and children in the Middle East.

Kanad Hospital is a not-for-profit hospital that strives to diligently follow the teachings of Jesus in the way that we care for women, children, and their families. We have the privilege of being the

→First hospital in the Abu Dhabi Emirate

→First private hospital in the Emirate to attain JCI accreditation

→First hospital in the world to obtain JCI Clinical Care Program Certifications for:

- Treatment program for Respiratory Distress Syndrome in newborns
- Natural Birth after Cesarean Section program for mothers

If you are a dedicated ObGyn leader who shares our commitment to providing exceptional healthcare with compassion, we invite you to apply for the HOD position at Kanad Hospital. Join us in fulfilling our mission to honor God and transform communities with love and exceptional healthcare

Role Specific Responsibilities:

1. ObGyn services meet applicable local and national standards, laws, and regulations
2. ObGyn services are available to meet the needs related to the hospital's mission and patient population, the community's health care needs, and emergency needs, including after normal hours
3. Responsible and oversees Perinatal safety committee.
4. Responsible for monitoring and reviewing all ObGyn services are defined and carried out.
